GLOSSARY OF TERMS

The following is a glossary of frequently used abbreviations or acronyms that are found throughout this report.

Abbreviation or Acronym	Definition
2016 Form 10-K	Annual Report on Form 10-K for the year ended December 31, 2016
AFUDC	Allowance for funds used during construction
ARO	Asset retirement obligation
CAA	Clean Air Act
CCR	Coal combustion residual
CO_2	Carbon dioxide
COLI	Corporate-owned life insurance
CPP	Clean Power Plan
CWA	Clean Water Act
DOE	Department of Energy
ELG	Effluent limitations guidelines
EPA	Environmental Protection Agency
FERC	Federal Energy Regulatory Commission
FMBs	First mortgage bonds
GHG	Greenhouse gas
Great Plains Energy	Great Plains Energy Incorporated
HSR Act	Hart-Scott-Rodino Antitrust Improvements Act
JEC	Jeffrey Energy Center
KCC	Kansas Corporation Commission
KDHE	Kansas Department of Health & Environment
KGE	Kansas Gas and Electric Company
La Cygne	La Cygne Generating Station
Merger	Pending merger of equals between Westar Energy, Inc. and Great Plains Energy Incorporated
MPSC	Missouri Public Service Commission
NAAQS	National Ambient Air Quality Standards
NAV	Net Asset Value
NDT	Nuclear Decommissioning Trust
NOx	Nitrogen oxides
NRC	Nuclear Regulatory Commission
NSPS	New Source Performance Standard
PM	Particulate matter
RECA	Retail energy cost adjustment
RSU	Restricted share unit
RTO	Regional transmission organization
SO_2	Sulfur dioxide
SPP	Southwest Power Pool, Inc.
TFR	Transmission formula rate
VIE	Variable interest entity
Wolf Creek	Wolf Creek Generating Station
WOTUS	Waters of the United States

FORWARD-LOOKING STATEMENTS

Certain matters discussed in this Form 10-Q are "forward-looking statements." The Private Securities Litigation Reform Act of 1995 has established that these statements qualify for safe harbors from liability. Forward-looking statements may include words like we "believe," "anticipate," "expect," "estimate," "intend" and words of similar meaning. Forward-looking statements describe our future plans, objectives, expectations or goals. Such statements address future events and conditions concerning matters such as, but not limited to:

- the pending merger of equals (merger) between Westar Energy, Inc. and Great Plains Energy Incorporated (Great Plains Energy), including the expected timing of closing the merger and costs expected to be incurred in connection with the merger,
- amount, type and timing of capital expenditures,
- earnings,
- cash flow,
- liquidity and capital resources,
- litigation,
- accounting matters,
- compliance with debt and other restrictive covenants,
- interest rates and dividends,
- environmental matters,
- regulatory matters,
- nuclear operations, and
- the overall economy of our service area and its impact on our customers' demand for electricity and their ability to pay for service.

What happens in each case could vary materially from what we expect because of such things as:

- risks related to operating in a heavily regulated industry that is subject to unpredictable political, legislative, judicial and regulatory developments, which can impact our operations, results of operations, and financial condition,
- the difficulty of predicting the magnitude and timing of changes in demand for electricity, including with respect to emerging competing services and technologies and conservation and energy efficiency measures,
- the impact of weather conditions, including as it relates to sales of electricity and prices of energy commodities,
- equipment damage from storms and extreme weather,
- economic and capital market conditions, including the impact of inflation or deflation, changes in interest rates, the cost and availability of
 capital and the market for trading wholesale energy,
- the impact of changes in market conditions on employee benefit liability calculations and funding obligations, as well as actual and assumed investment returns on invested plan assets,
- the impact of changes in estimates regarding our Wolf Creek Generating Station (Wolf Creek) decommissioning obligation,
- the existence or introduction of competition into markets in which we operate,
- the impact of changing laws and regulations relating to air and greenhouse gas (GHG) emissions, water emissions, waste management and other environmental matters,
- risks associated with execution of our planned capital expenditure program, including timing and receipt of regulatory approvals necessary for
 planned construction and expansion projects as well as the ability to complete planned construction projects within the terms and time frames
 anticipated,
- cost, availability and timely provision of equipment, supplies, labor and fuel we need to operate our business,
- availability of generating capacity and the performance of our generating plants,
- changes in regulation of nuclear generating facilities and nuclear materials and fuel, including possible shutdown or required modification of nuclear generating facilities,
- uncertainties with respect to procurement of nuclear fuel and related services, which are dependent on a single supplier,
- additional regulation due to the Nuclear Regulatory Commission (NRC) oversight to ensure the safe operation of Wolf Creek, either related to Wolf Creek's performance, or potentially relating to events or performance at a nuclear plant anywhere in the world,
- uncertainty regarding the establishment of interim or permanent sites for spent nuclear fuel storage and disposal,
- homeland security and information and operating systems security considerations,
- our inability to fully utilize expected tax credits,
- changes in accounting requirements and other accounting matters,

- changes in the energy markets in which we participate such as the development and implementation of real time and next day trading markets, and the effect of the retroactive repricing of transactions in such markets following execution because of changes or adjustments in market pricing mechanisms by regional transmission organizations (RTOs) and independent system operators,
- reduced demand for coal-based energy because of actual or perceived climate impacts and the development of alternate energy sources,
- current and future litigation, regulatory investigations, proceedings or inquiries,
- cost of fuel used in generation and wholesale electricity prices,
- certain risks and uncertainties associated with the merger, including, without limitation, those related to:
 - receipt of approval from our shareholders and shareholders of Great Plains Energy,
 - the timing of, and the conditions imposed by, regulatory approvals required for the merger,
 - the occurrence of any event, change or other circumstances that could give rise to the termination of the merger agreement or could otherwise cause the failure of the merger to close,
 - the outcome of any legal proceedings, regulatory proceedings or enforcement matters that have been or may be instituted in connection with the merger,
 - the receipt of an unsolicited offer from another party to acquire our assets or capital stock (or those of Great Plains Energy) that could interfere with the proposed merger,
 - the timing to consummate the proposed merger,
 - disruption from the proposed merger making it more difficult to maintain relationships with customers, employees, regulators or suppliers,
 - the diversion of management time and attention on the merger,
 - the amount of costs, fees, expenses and charges related to the merger,
 - the possibility that the expected value creation from the merger will not be realized, or will not be realized within the expected time period,
 - difficulties related to the integration of the two companies,
 - the credit ratings of the combined company following the merger, and
 - the effect and timing of changes in laws or in governmental regulations (including environmental laws and regulations) that could adversely affect our participation in the merger, and
- other factors discussed elsewhere in this report and in our Annual Report on Form 10-K for the year ended December 31, 2016 (2016 Form 10-K), including in "Item 1A. Risk Factors" and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," and in other reports we file from time to time with the SEC.

These lists are not all-inclusive because it is not possible to predict all factors. This report should be read in its entirety and in conjunction with our 2016 Form 10-K and the other reports we file from time to time with the SEC. No one section of this report deals with all aspects of the subject matter and additional information on some matters that could impact our condensed consolidated financial results may be included in our 2016 Form 10-K and the other reports we file from time to time with the SEC. The reader should not place undue reliance on any forward-looking statement, as forward-looking statements speak only as of the date such statements were made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement was made.

WESTAR ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. DESCRIPTION OF BUSINESS

We are the largest electric utility in Kansas. Unless the context otherwise indicates, all references in this Quarterly Report on Form 10-Q to "the Company," "we," "us," "our" and similar words are to Westar Energy, Inc. and its consolidated subsidiaries. The term "Westar Energy" refers to Westar Energy, Inc., a Kansas corporation incorporated in 1924, alone and not together with its consolidated subsidiaries.

We provide electric generation, transmission and distribution services to approximately 708,000 customers in Kansas. Westar Energy provides these services in central and northeastern Kansas, including the cities of Topeka, Lawrence, Manhattan, Salina and Hutchinson. Kansas Gas and Electric Company (KGE), Westar Energy's wholly owned subsidiary, provides these services in south-central and southeastern Kansas, including the city of Wichita. Both Westar Energy and KGE conduct business using the name Westar Energy. Our corporate headquarters is located at 818 South Kansas Avenue, Topeka, Kansas 66612.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

We prepare our unaudited condensed consolidated financial statements in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, certain information and footnote disclosures normally included in financial statements presented in accordance with generally accepted accounting principles (GAAP) for the United States of America have been condensed or omitted. Our condensed consolidated financial statements include all operating divisions, majority owned subsidiaries and variable interest entities (VIEs) of which we maintain a controlling interest or are the primary beneficiary reported as a single reportable segment. Undivided interests in jointly-owned generation facilities are included on a proportionate basis. Intercompany accounts and transactions have been eliminated in consolidation. In our opinion, all adjustments, consisting of normal recurring adjustments considered necessary for a fair presentation of the condensed consolidated financial statements, have been included.

The accompanying condensed consolidated financial statements and notes should be read in conjunction with the consolidated financial statements and notes included in our 2016 Form 10-K.

Use of Management's Estimates

When we prepare our condensed consolidated financial statements, we are required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of our condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. We evaluate our estimates on an ongoing basis, including those related to depreciation, unbilled revenue, valuation of investments, forecasted fuel costs included in our retail energy cost adjustment (RECA) billed to customers, income taxes, pension and post-retirement benefits, our asset retirement obligations (AROs) including the decommissioning of Wolf Creek, environmental issues, VIEs, contingencies and litigation. Actual results may differ from those estimates under different assumptions or conditions. The results of operations for the three and six months ended June 30, 2017, are not necessarily indicative of the results to be expected for the full year.

Fuel Inventory and Supplies

We state fuel inventory and supplies at average cost. Following are the balances for fuel inventory and supplies stated separately.

	As of		As of				
	June 30, 2017	Decem	ber 31, 2016				
	(In Thousands)						
Fuel inventory	\$ 106,764	\$	107,086				
Supplies	195,932		193,039				
Fuel inventory and supplies	\$ 302,696	\$	300,125				

Allowance for Funds Used During Construction

Allowance for funds used during construction (AFUDC) represents the allowed cost of capital used to finance utility construction activity. We compute AFUDC by applying a composite rate to qualified construction work in progress. We credit other income (for equity funds) and interest expense (for borrowed funds) for the amount of AFUDC capitalized as construction cost on the accompanying condensed consolidated statements of income as follows.

	T	hree Months	Ende	d June 30,		Six Months Ended June 30,						
		2017		2016		2017		2016				
		(Dollars In Thousands)										
Borrowed funds	\$	895	\$	2,338	\$	2,748	\$	4,347				
Equity funds		_		2,783		773		5,247				
Total	\$	895	\$	5,121	\$	3,521	\$	9,594				
Average AFUDC Rates		1.5%		4.2%		2.0%	4.6%					

Earnings Per Share

We have participating securities in the form of unvested restricted share units (RSUs) with nonforfeitable rights to dividend equivalents that receive dividends on an equal basis with dividends declared on common shares. As a result, we apply the two-class method of computing basic and diluted earnings per share (EPS).

To compute basic EPS, we divide the earnings allocated to common stock by the weighted average number of common shares outstanding. Diluted EPS includes the effect of issuable common shares resulting from our RSUs with forfeitable rights to dividend equivalents. We compute the dilutive effect of potential issuances of common shares using the treasury stock method.

The following table reconciles our basic and diluted EPS from net income.

	Three Months Ended June 30,					Six Months Ended June 30			
	2017 2016					2017		2016	
		(Dollars	In 7	Thousands, Ex	cept	Per Share A	mou	ints)

New Accounting Pronouncements

We prepare our condensed consolidated financial statements in accordance with GAAP for the United States of America. To address current issues in accounting, the Financial Accounting Standards Board (FASB) issued the following new accounting pronouncements that may affect our accounting and/or disclosure.

Compensation - Retirement Benefits

In March 2017, the FASB issued Accounting Standard Update No. 2017-07, which requires employers to disaggregate the service cost component from other components of net periodic benefit costs and to disclose the amounts of net periodic benefit costs that are included in each income statement line item. The standard requires employers to report the service cost component in the same line item as other compensation costs and to report the other components of net periodic benefit costs (which include interest costs, expected return on plan assets, amortization of prior service cost or credits and actuarial gains and losses) separately and outside a subtotal of operating income. Of the components of net periodic benefit cost, only the service cost component will be eligible for capitalization as property, plant and equipment, which is to be applied prospectively. The other components of net periodic benefit costs that are no longer eligible for capitalization as property, plant and equipment will be recorded as a regulatory asset. The guidance changing the presentation in the statements of income is to be applied on a retrospective basis. The new standard is effective for annual periods beginning after December 15, 2017. We are evaluating the guidance and do not expect it to have a material impact on our condensed consolidated financial statements.

Revenue Recognition

In May 2014, the FASB issued ASU No. 2014-09, which addresses revenue from contracts with customers. Subsequent ASUs have been released providing modifications and clarifications to ASU No. 2014-09. The objective of the new guidance is to establish principles to report useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue from contracts with customers. Under the new standard, an entity must identify the performance obligations in a contract, determine the transaction price and allocate the price to specific performance obligations to recognize the revenue when the obligation is completed. This guidance is effective for fiscal years beginning after December 15, 2017. Early application of the standard is permitted for fiscal years beginning after December 15, 2016. The standard permits the use of either the retrospective application or modified retrospective method. We will use the modified retrospective method, which requires a cumulative-effect adjustment to be recorded on the balance sheet as of the beginning of 2018, if applicable, as if the standard had always been in effect. We continue to analyze the impact of the new revenue standard and related ASUs. We completed initial revenue contract assessments. In summary, material revenue streams were identified and representative contract/transaction types were sampled. We also continue to monitor unresolved industry issues, including items related to contributions in aid of construction, collectability and alternative revenue programs, and will analyze the related impacts to revenue recognition. We are finalizing our changes to revenue-related disclosure and ensuring we have effective internal controls over financial reporting. Based upon our completed assessments, we do not expect the impact on our condensed consolidated financial statements to be material.

3. PENDING MERGER

On May 29, 2016, we entered into an agreement and plan of merger with Great Plains Energy that provided for the acquisition of Westar by Great Plains Energy. On April 19, 2017, the Kansas Corporation Commission (KCC) denied our and Great Plains Energy's merger application.

On July 9, 2017, we entered into an amended and restated agreement and plan of merger with Great Plains Energy that provides for a merger of equals between the two companies. Upon closing, each issued and outstanding share of our common stock will be converted into one share of common stock of a new holding company with a final name still to be determined. Upon closing, each issued and outstanding share of Great Plains Energy common stock will be converted into 0.5981 shares of common stock of the new holding company. Following completion of the merger, our shareholders are expected to own approximately 52.5% of the new holding company and Great Plains Energy's shareholders are expected to own approximately 47.5% of the new holding company.

The closing of the merger is subject to conditions including, among others, approval of our shareholders representing a majority of the outstanding shares of our common stock; approval of Great Plains Energy's shareholders representing two-thirds of the outstanding shares of Great Plains Energy common stock; clearance under the Hart-Scott-Rodino Antitrust Improvements Act (HSR Act); receipt of all required regulatory approvals from, among others, the Federal Energy Regulatory Commission (FERC), the NRC, the KCC, and the Missouri Public Service Commission (MPSC) (provided that such approvals

do not result in a material adverse effect on Great Plains Energy or us, after giving effect to the merger, measured on the size and scale of Westar and its subsidiaries, taken as a whole); effectiveness of the registration statement for the shares of the new holding company's common stock to be issued to our shareholders and Great Plains Energy's shareholders upon consummation of the merger and approval of the listing of such shares on the New York Stock Exchange; the receipt of tax opinions by us and Great Plains Energy that the merger will be treated as a non-taxable event for U.S. federal income tax purposes; there being no shares of Great Plains Energy preference stock outstanding; and Great Plains Energy having not less than \$1.25 billion in cash or cash equivalents on its balance sheet. The closing of the merger is also subject to other standard conditions, such as accuracy of representations and warranties, compliance with covenants and the absence of a material adverse effect on either company.

Either party may terminate the amended and restated merger agreement if the merger is not consummated by July 10, 2018, subject to an extension of up to six months. Either party may also terminate the agreement if our shareholders or Great Plains Energy's shareholders do not approve the merger or an order that prohibits the merger becomes final and non-appealable. There are also termination rights for both parties in certain cases if the other party's board of directors changes its recommendation to its shareholders regarding approval of the merger, or the other party accepts an alternative, superior offer.

The amended and restated merger agreement provides that Great Plains Energy may be required to pay us a termination fee of \$190.0 million if the agreement is terminated due to (i) failure to receive regulatory approval prior to July 10, 2018, subject to an extension of up to six months, (ii) a non-appealable regulatory order enjoining the merger or (iii) Great Plains Energy's failure to close after all conditions precedent to closing have been satisfied. In addition, we may be required to pay Great Plains Energy a termination fee of \$190.0 million if the agreement is terminated by us under certain circumstances, such as entering into a definitive acquisition agreement with respect to a superior proposal or by Great Plains Energy as a result of our board of directors changing its recommendation of the merger prior to our shareholder approval having been obtained. Similarly, Great Plains Energy may be required to pay us a termination fee of \$190.0 million if the agreement is terminated by Great Plains Energy under certain circumstances, such as entering into a definitive acquisition agreement with respect to a superior proposal or by us as a result of Great Plains Energy's board of directors changing its recommendation of the merger prior to its shareholder approval having been obtained. Additionally, if the agreement is terminated by either Great Plains Energy or us as a result of Great Plains Energy's shareholders not approving the agreement, Great Plains Energy may be required to pay us a termination fee of \$80.0 million.

In connection with the merger, we have incurred, and expect to incur additional, merger-related expenses. These expenses are included in our selling, general, and administrative expenses. During 2016, we incurred approximately \$10.2 million of merger-related expenses. During the three and six months ended June 30, 2017, we incurred approximately \$0.3 million and \$0.7 million, respectively, of merger-related expenses. We incurred approximately \$7.5 million in additional merger-related expenses in July 2017, with the balance of expenses to be incurred through the closing of the merger. In the event that the merger is consummated, we expect total merger-related expenses will be approximately \$45.0 million.

See also Note 13, "Legal Proceedings," for more information on litigation related to the merger.

4. RATE MATTERS AND REGULATION

KCC Proceedings

In October 2016, we filed an abbreviated rate review with the KCC to update our prices to include capital costs related to La Cygne Generating Station (La Cygne) environmental upgrades, investment to extend the life of Wolf Creek, costs related to programs to improve grid resiliency and costs associated with investments in other environmental projects during 2015. In May 2017, we entered into a settlement agreement with the major parties to the rate review. In June 2017, the agreement was approved by the KCC. The new prices were effective June 2017 and are expected to increase our annual retail revenues by approximately \$16.4 million.

In March 2017, the KCC issued an order allowing us to adjust our retail prices to include updated transmission costs as reflected in the transmission formula rate (TFR). The new prices were effective in April 2017 and are expected to increase our annual retail revenues by approximately \$12.7 million.

In December 2016, the KCC approved an order allowing us to adjust our prices to include costs incurred for property taxes. The new prices were effective in January 2017 and are expected to decrease our annual retail revenues by approximately \$26.8 million.

FERC Proceedings

Our TFR that includes projected 2017 transmission capital expenditures and operating costs was effective in January 2017 and is expected to increase our annual transmission revenues by approximately \$29.6 million. This updated rate provided the basis for our request with the KCC to adjust our retail prices to include updated transmission costs as discussed above.

5. FINANCIAL INSTRUMENTS AND TRADING SECURITIES

Values of Financial Instruments

GAAP establishes a hierarchical framework for disclosing the transparency of the inputs utilized in measuring assets and liabilities at fair value. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the classification of assets and liabilities within the fair value hierarchy levels. In addition, we measure certain investments that do not have a readily determinable fair value at net asset value (NAV), which are not included in the fair value hierarchy. Further explanation of these levels and NAV is summarized below.

- Level 1 Quoted prices are available in active markets for identical assets or liabilities. The types of assets and liabilities included in level 1 are highly liquid and actively traded instruments with quoted prices, such as equities listed on public exchanges.
- Level 2 Pricing inputs are not quoted prices in active markets, but are either directly or indirectly observable. The types of assets and liabilities included in level 2 are typically liquid investments in funds that have a readily determinable fair value calculated using daily NAVs, other financial instruments that are comparable to actively traded securities or contracts, such as treasury securities with pricing interpolated from recent trades of similar securities, or other financial instruments priced with models using highly observable inputs.
- Level 3 Significant inputs to pricing have little or no transparency. The types of assets and liabilities included in level 3 are those with inputs
 requiring significant management judgment or estimation.
- Net Asset Value Investments that do not have a readily determinable fair value are measured at NAV. These investments do not consider the observability of inputs, therefore, they are not included within the fair value hierarchy. We include in this category investments in private equity, real estate and alternative investment funds that do not have a readily determinable fair value. The underlying alternative investments include collateralized debt obligations, mezzanine debt and a variety of other investments.

We record cash and cash equivalents, short-term borrowings and variable-rate debt on our condensed consolidated balance sheets at cost, which approximates fair value. We measure the fair value of fixed-rate debt, a level 2 measurement, based on quoted market prices for the same or similar issues or on the current rates offered for instruments of the same remaining maturities and redemption provisions. The recorded amount of accounts receivable and other current financial instruments approximates fair value.

We measure fair value based on information available as of the measurement date. The following table provides the carrying values and measured fair values of our fixed-rate debt.

		As of Jun	e 30	, 2017		As of Decen	nber	31, 2016
	Ca	rrying Value		Fair Value	Ca	rrying Value		Fair Value
				(In Tho	ousar	ıds)

Some of our investments in the Nuclear Decommissioning Trust (NDT) are measured at NAV and do not have readily determinable fair values. These investments are either with investment companies or companies that follow accounting guidance consistent with investment companies. In certain situations, these investments may have redemption restrictions. The following table provides additional information on these investments.

⁽a) This investment is in four long-term private equity funds that do not permit early withdrawal. Our investments in these funds cannot be distributed until the underlying investments have been liquidated, which may take years from the date of initial liquidation. Two funds have begun to make distributions. Our initial investment in the third fund occurred in 2013. Our initial investment in the fourth fund occurred in the second quarter of 2016. The term of the third and fourth fund is 15 years, subject to the general partner's right to extend the term for up to three additional one-year periods.

(b) There is a holdback on final redemptions.

Price Risk

We use various types of fuel, including coal, natural gas, uranium and diesel to operate our plants and also purchase power to meet customer demand. Our prices and condensed consolidated financial results are exposed to market risks from commodity price changes for electricity and other energy-related products as well as from interest rates. Volatility in these markets impacts our costs of purchased power, costs of fuel for our generating plants and our participation in energy markets. We strive to manage our customers' and our exposure to market risks through regulatory, operating and financing activities and, when we deem appropriate, we economically hedge a portion of these risks through the use of derivative financial instruments for non-trading purposes.

Interest Rate Risk

We have entered into numerous fixed and variable rate debt obligations. We manage our interest rate risk related to these debt obligations by limiting our exposure to variable interest rate debt, diversifying maturity dates and entering into treasury yield hedge transactions. We may also use other financial derivative instruments such as interest rate swaps.

6. FINANCIAL INVESTMENTS

We report our investments in equity and debt securities at fair value and use the specific identification method to determine their realized gains and losses. We classify these investments as either trading securities or available-for-sale securities as described below.

Trading Securities

We hold equity and debt investments that we classify as trading securities in a trust used to fund certain retirement benefit obligations. As of June 30, 2017, and December 31, 2016, we measured the fair value of trust assets at \$33.6 million and \$34.5 million, respectively. We include unrealized gains or losses on these securities in investment earnings on our condensed consolidated statements of income. For the three and six months ended June 30, 2017, we recorded an unrealized gain of \$1.1 million and \$2.5 million, respectively, on assets still held in the trust. For the three and six months ended June 30, 2016, we recorded an unrealized gain of \$0.6 million and \$1.1 million, respectively, on assets still held in the trust.

Available-for-Sale Securities

We hold investments in a trust for the purpose of funding the decommissioning of Wolf Creek. We have classified these investments as available-forsale and have recorded all such investments at their fair market value as of June 30, 2017, and December 31, 2016.

Using the specific identification method to determine cost, we realized a \$0.2 million gain during the three months ended June 30, 2017, and a gain of \$0.1 million during the six months ended June 30, 2017. We realized a gain of \$0.1 million for the three months ended June 30, 2016, and a loss of \$1.4 million for the six months ended June 30, 2016. We record net realized and unrealized gains and losses in regulatory liabilities on our condensed consolidated balance sheets. This reporting is consistent with the method we use to account for the decommissioning costs we recover in our prices. Gains or losses on assets in the trust fund are recorded as increases or decreases, respectively, to regulatory liabilities and could result in lower or higher funding requirements for decommissioning costs, which we believe would be reflected in the prices paid by our customers.

The following table presents the cost, gross unrealized gains and losses, fair value and allocation of investments in the NDT fund as of June 30, 2017, and December 31, 2016.

7. DEBT FINANCING

In January 2017, Westar Energy retired \$125.0 million in principal amount of first mortgage bonds (FMBs) bearing a stated interest at 5.15% maturing January 2017.

In March 2017, Westar Energy issued \$300.0 million in principal amount of FMBs bearing a stated interest at 3.10% and maturing April 2027.

8. TAXES

We recorded income tax expense of \$35.9 million with an effective income tax rate of 32% for the three months ended June 30, 2017, and income tax expense of \$40.5 million with an effective income tax rate of 35% for the same period of 2016. The decrease in the effective income tax rate for the three months ended June 30, 2017, was due primarily to increases in tax benefits from production tax credits, largely from placing the Western Plains Wind Farm in service. We recorded income tax expense of \$56.8 million with an effective income tax rate of 29% for the six months ended June 30, 2017, and income tax expense of \$79.2 million with an effective income tax rate of 35% for the same period of 2016. The decrease in the effective income tax rate for the six months ended June 30, 2017, was due primarily to a decrease in income before income taxes and increases in tax benefits from production tax credits, largely from placing the Western Plains Wind Farm in service.

As of June 30, 2017, and December 31, 2016, our unrecognized income tax benefits totaled \$2.8 million. We do not expect significant changes in our unrecognized income tax benefits in the next 12 months.

As of June 30, 2017, we had \$0.1 million accrued for interest related to our unrecognized income tax benefits compared to no amount as of December 31, 2016. We accrued no penalties at either June 30, 2017, or December 31, 2016.

As of June 30, 2017, and December 31, 2016, we had recorded \$0.1 million and \$1.5 million, respectively, for probable assessments of taxes other than income taxes.

9. PENSION AND POST-RETIREMENT BENEFIT PLANS

The following tables summarize the net periodic costs for our pension and post-retirement benefit plans prior to the effects of capitalization.

		Pension	Ber	Post-retirement Benefits				
Three Months Ended June 30,		2017	2016		2017			2016
	(In The					nds)		
Components of Net Periodic Cost (Benefit):

⁽a) The regulatory adjustment represents the difference between current period pension or post-retirement benefit expense and the amount of such expense recognized in setting our prices.

During the six months ended June 30, 2017 and 2016, we contributed \$13.1 million and \$11.2 million, respectively, to the Westar Energy pension trust.

10. WOLF CREEK PENSION AND POST-RETIREMENT BENEFIT PLANS

As a co-owner of Wolf Creek, KGE is indirectly responsible for 47% of the liabilities and expenses associated with the Wolf Creek pension and post-retirement benefit plans. The following tables summarize the net periodic costs for KGE's 47% share of the Wolf Creek pension and post-retirement benefit plans prior to the effects of capitalization.

	Pension Benefits					Post-retirem	Benefits	
Three Months Ended June 30,		2017		2016		2017		2016
	(In 7					nds)		
Components of Net Periodic Cost (Benefit):

⁽a) The regulatory adjustment represents the difference between current period pension or post-retirement benefit expense and the amount of such expense recognized in setting our prices.

During the six months ended June 30, 2017, we did not fund Wolf Creek's pension plan. During the six months ended June 30, 2016, we funded \$3.2 million of Wolf Creek's pension plan contributions.

11. COMMITMENTS AND CONTINGENCIES

Environmental Matters

Set forth below are descriptions of contingencies related to environmental matters that may impact us or our financial results. Our assessment of these contingencies, which are based on federal and state statutes and regulations, and regulatory agency and judicial interpretations and actions, has evolved over time. There are a variety of final and proposed laws and regulations that could have a material adverse effect on our operations and condensed consolidated financial results. Due in part to the complex nature of environmental laws and regulations, we are unable to assess the impact of potential changes that may develop with respect to the environmental contingencies described below.

Cross-State Air Pollution Update Rule

In September 2016, the Environmental Protection Agency (EPA) finalized the Cross-State Air Pollution Update Rule. The final rule addresses interstate transport of nitrogen oxide (NOx) emissions in 22 states including Kansas, Missouri and Oklahoma during the ozone season and the impact from the formation of ozone on downwind states with respect to the 2008 ozone National Ambient Air Quality Standards (NAAQS). Starting with the 2017 ozone season, the final rule will revise the existing ozone season allowance budgets for Missouri and Oklahoma and will establish an ozone season budget for Kansas. Various states and others are challenging the rule in the U.S. Court of Appeals for the D.C. Circuit. We do not believe this rule will have a material impact on our operations and condensed consolidated financial results.

National Ambient Air Quality Standards

Under the federal Clean Air Act (CAA), the EPA sets NAAQS for certain emissions known as the "criteria pollutants" considered harmful to public health and the environment, including two classes of particulate matter (PM), ozone, NOx (a precursor to ozone), carbon monoxide and sulfur dioxide (SO₂), which result from fossil fuel combustion. Areas meeting the NAAQS are designated attainment areas while those that do not meet the NAAQS are considered nonattainment areas. Each state must develop a plan to bring nonattainment areas into compliance with the NAAQS. NAAQS must be reviewed by the EPA at five-year intervals.

In October 2015, the EPA strengthened the ozone NAAQS by lowering the standards from 75 ppb to 70 ppb. In September 2016, the Kansas Department of Health & Environment (KDHE) recommended to the EPA that they designate eight counties in the state of Kansas as in attainment with the standard, and each remaining county in Kansas as in attainment/unclassifiable. The EPA is required to make attainment/nonattainment designations for the revised standards by October 2017, with an option to extend this deadline by one year. If the EPA agrees with the recommended designations for the state of Kansas, we do not believe this will have a material impact on our condensed consolidated financial results.

Various states and others are challenging the revised 2015 ozone NAAQS in the D.C. Circuit. In April 2017, at the request of the EPA, the court issued an order holding the case in abeyance because the new administration is planning to review the 2015 ozone NAAQS and will determine whether to reconsider all or a portion of the rule.

In December 2012, the EPA strengthened an existing NAAQS for one class of PM. In December 2014, the EPA designated the entire state of Kansas as unclassifiable/in attainment with the standard. We do not believe this will have a material impact on our operations or condensed consolidated financial results.

In 2010, the EPA revised the NAAQS for SO₂. In March 2015, a federal court approved a consent decree between the EPA and environmental groups. The decree includes specific SO₂ emissions criteria for certain electric generating plants that, if met, required the EPA to promulgate attainment/nonattainment designations for areas surrounding these plants. Tecumseh Energy Center is our only generating station that meets this criteria. In June 2016, the EPA accepted the State of Kansas recommendation to designate the areas surrounding the facility as unclassifiable, completing the second round of the designation process. In addition, in January 2017, KDHE formally recommended to the EPA a 2,000 ton per year limit for Tecumseh Energy Center Unit 7 in order to satisfy the requirements of the 1-hour SO₂ Data Requirements Rule that governs the next round of the designations. By agreeing to the 2,000 ton per year limitation, no further characterization of the area surrounding the plant is required.

We continue to communicate with our regulatory agencies regarding these standards and evaluate what impact the revised NAAQS could have on our operations and condensed consolidated financial results. If areas surrounding our facilities are designated in the future as nonattainment and/or we are required to install additional equipment to control emissions at our facilities, it could have a material impact on our operations and condensed consolidated financial results.

Greenhouse Gases

Burning coal and other fossil fuels releases carbon dioxide (CO₂) and other gases referred to as GHG. Various regulations under the federal CAA limit CO₂ and other GHG emissions, and other measures are being imposed or offered by individual states, municipalities and regional agreements with the goal of reducing GHG emissions.

In October 2015, the EPA published a rule establishing new source performance standards (NSPS) for GHGs that limit CO₂ emissions for new, modified and reconstructed coal and natural gas fueled electric generating units to various levels per MWh depending on various characteristics of the units. Legal challenges to the GHG NSPS have been filed in the D.C. Circuit by various states and industry members. Also in October 2015, the EPA published a rule establishing guidelines for states to regulate CO₂ emissions from existing power plants. The standards for existing plants are known as the Clean Power Plan (CPP). Under the CPP, interim emissions performance rates must be achieved beginning in 2022 and final emissions performance rates must be achieved by 2030. Legal challenges to the CPP were filed by groups of states and industry members, including us, in the D.C. Circuit. In February 2016, after the U.S. Court of Appeals for the D.C. Circuit denied requests to stay the CPP, the U.S. Supreme Court issued an order granting a stay of the rule pending resolution of the legal challenges. In September 2016, oral arguments were heard before an en banc panel of D.C. Circuit judges and a decision on the legal challenges is pending.

In March 2017, President Trump signed an Executive Order instructing the EPA to immediately review the CPP and GHG NSPS, and "if appropriate . . . as soon as practicable . . . publish for notice and comment proposed rules suspending, revising or rescinding those rules." On the same day the Executive Order was signed, the EPA filed motions with the D.C. Circuit asking the court to hold the challenges to the CPP and the GHG NSPS in abeyance while the EPA completes its administrative review of the rules and issues any forthcoming rulemakings. In April 2017, the court issued orders to hold the cases in abeyance for 60 days and requested briefing on whether the cases should be remanded to the EPA or continue to be held in abeyance. In May 2017, all parties in the case filed supplemental briefs stating their positions regarding remanding the rule back to the EPA or continuing to hold the case in abeyance.

Also in April 2017, the EPA published in the Federal Register a notice of withdrawal of the proposed CPP federal plan, proposed model trading rules and proposed Clean Energy Incentive Program design details, in light of the Executive Order and the agency's review of the CPP. Also in April 2017, the EPA published a notice in the Federal Register that it is initiating administrative reviews of the CPP and the GHG NSPS in light of the Executive Order.

Due to the future uncertainty of the CPP, we cannot determine the impact on our operations or condensed consolidated financial results, but we believe the cost to comply with the CPP, should it be upheld and implemented in its current or a substantially similar form, could be material.

Water

We discharge some of the water used in our operations. This water may contain substances deemed to be pollutants. Revised rules governing such discharges from coal-fired power plants were issued in November 2015. The final rule establishes effluent limitations guidelines (ELGs) and standards for wastewater discharges, including limits on the amount of toxic metals and other pollutants that can be discharged. Implementation timelines for these requirements vary from 2019 to 2023. In April 2017, the EPA announced it is reconsidering the ELG rule and court challenges have been placed in abeyance pending the EPA's review. In June 2017, the EPA proposed a rule to postpone the compliance dates for the new, more stringent, effluent limitations and pretreatment standards for each of the following waste streams: fly ash transport water, bottom ash transport water, flue gas desulfurization wastewater, flue gas mercury control wastewater, and gasification wastewater. These compliance dates would be postponed until the EPA completes its administrative reconsideration of the ELG rule. We are evaluating the final rule and related developments and cannot predict the resulting impact on our operations or condensed consolidated financial results, but believe costs to comply could be material if the rule is implemented in its current or substantially similar form.

In October 2014, the EPA's final standards for cooling intake structures at power plants to protect aquatic life took effect. The standards, based on Section 316(b) of the federal Clean Water Act (CWA), require subject facilities to choose among seven best available technology options to reduce fish impingement. In addition, some facilities must conduct studies to assist permitting authorities to determine whether and what site-specific controls, if any, would be required to reduce entrainment of aquatic organisms. Our current analysis indicates this rule will not have a significant impact on our coal plants that employ cooling towers. Biological monitoring may be required for La Cygne and Wolf Creek. We are currently evaluating the rule's impact on those two plants and cannot predict the resulting impact on our operations or condensed consolidated financial results, but we do not expect it to be material.

In June 2015, the EPA along with the U.S. Army Corps of Engineers issued a final rule, effective August 2015, defining the Waters of the United States (WOTUS) for purposes of the CWA. This rulemaking has the potential to impact all programs under the CWA. Expansion of regulated waterways is possible under the rule depending on regulating authority interpretation, which could impact several permitting programs. Various states and others have filed lawsuits challenging the WOTUS rule in district courts and courts of appeals across the country. The appellate court challenges have been consolidated in the U.S. Court of Appeals for the Sixth Circuit and, in October 2015, the Sixth Circuit issued an order that temporarily stays implementation of the WOTUS rule nationwide pending the outcome of the various legal challenges. In July 2017, the EPA and the U.S. Army Corps of Engineers published in the Federal Register a proposed rule that would, if implemented, reinstate the definition of WOTUS that existed prior to the June 2015 expansion of the definition. We are currently evaluating the WOTUS rule and related developments. We do not believe the rule, if upheld and implemented in its current or substantially similar form, will have a material impact on our operations or condensed consolidated financial results.

Regulation of Coal Combustion Residuals

In the course of operating our coal generation plants, we produce coal combustion residuals (CCRs), including fly ash, gypsum and bottom ash. We recycle some of our ash production, principally by selling to the aggregate industry. The EPA published a rule to regulate CCRs in April 2015, which we believe will require additional CCR handling, processing and storage equipment and closure of certain ash disposal ponds. Impacts to operations will be dependent on the development of groundwater monitoring of CCR units being completed in 2017. The Water Infrastructure Improvements for the Nation Act allows states to achieve delegated authority for CCR rules from the EPA. This has the potential to impact compliance options. We have recorded an ARO for our current estimate for closure of ash disposal ponds but we may be required to record additional AROs in the future due to changes in existing CCR regulations, changes in interpretation of existing CCR regulations or changes in the timing or cost to close ash disposal ponds. If additional AROs are necessary, we believe the impact on our operations or condensed consolidated financial results could be material.

SPP Revenue Crediting

We are a member of the Southwest Power Pool, Inc. (SPP) RTO, which coordinates the operation of a multi-state interconnected transmission system. In 2016, the SPP completed a process of allocating revenue credits under its Open Access Transmission Tariff to sponsors of certain transmission system upgrades. Qualifying upgrades are generation interconnection or transmission service projects that benefit SPP members and that are paid for directly by a sponsor without customer support. The SPP determined sponsors are entitled to revenue credits for previously completed upgrades, and members are obligated to pay for revenue credits attributable to these historical upgrades. As a result, in November 2016 we paid the SPP \$7.6 million related to revenue credits attributable to historical upgrades from March 2008 to August 2016.

In 2017, the SPP notified us that it would be issuing revised allocations. Due to the complexity of the allocation process, including the large number of transmission service requests associated with the upgrades at issue, the number of years included in the process and the complexity surrounding the manner in which revenue credits are allocated, we are unable to estimate whether the amount we previously paid will change. If the SPP's revised calculation allocates additional charges to us, we believe that most of the additional charges will be recovered from our customers in future prices.

Storage of Spent Nuclear Fuel

In 2010, the Department of Energy (DOE) filed a motion with the NRC to withdraw its then pending application to construct a national repository for the disposal of spent nuclear fuel and high-level radioactive waste at Yucca Mountain, Nevada. An NRC board denied the DOE's motion to withdraw its application and the DOE appealed that decision to the full NRC. In 2011, the NRC issued an evenly split decision on the appeal and also ordered the licensing board to close out its work on the DOE's application by the end of 2011 due to a lack of funding. These agency actions prompted the states of Washington and South Carolina, and a county in South Carolina, to file a lawsuit in a federal Court of Appeals asking the court to compel the NRC to resume its license review and to issue a decision on the license application. In August 2013, the court ordered the NRC to resume its review of the DOE's application. The NRC has not yet issued its decision.

Wolf Creek is currently evaluating alternatives for expanding its existing on-site spent nuclear fuel storage to provide additional capacity prior to 2025. Wolf Creek has finalized a settlement agreement through 2019 with the DOE for reimbursement of costs to construct this facility that would not have otherwise been incurred had the DOE began accepting spent nuclear fuel. As a co-owner of Wolf Creek, we received \$0.8 million of the settlement representing reimbursement of costs incurred through 2015 for project planning. We plan to apply for reimbursement of additional costs incurred after 2015. We cannot predict when, or if, an off-site storage site or alternative disposal site will be available to receive Wolf Creek's spent nuclear fuel and will continue to monitor this activity.

12. ASSET RETIREMENT OBLIGATIONS

In 2017, we recorded a new ARO liability of approximately \$13.5 million corresponding to placing Western Plains Wind Farm in service. In addition, we revised our AROs by \$34.7 million relating to asbestos removal, CCR and other owned windfarms. See Note 11, "Commitments and Contingencies - Regulation of Coal Combustion Residuals," for additional information related to the CCR rule.

The change in the balance of our ARO liability from December 31, 2016, through June 30, 2017, is summarized in the following table.

	(In Thousands)
Balance as of December 31, 2016	\$ 323,951
Increase in ARO liabilities	13,471
Liabilities settled	(1,431)
Accretion expense	8,077
Revisions in estimated cash flows	34,713
Balance as of June 30, 2017	378,781
Balance included in other current liabilities	(10,548)
Long-term AROs	\$ 368,233

13. LEGAL PROCEEDINGS

We and our subsidiaries are involved in various legal, environmental and regulatory proceedings. We believe that adequate provisions have been made and accordingly believe that the ultimate disposition of such matters will not have a material effect on our condensed consolidated financial results. See Note 4, "Rate Matters and Regulation," and Note 11, "Commitments and Contingencies," for additional information.

Pending Merger

Following the announcement of the original merger agreement, two putative class action complaints (which were consolidated and superseded by a consolidated complaint) and one putative derivative complaint challenging the merger were filed in the District Court of Shawnee County, Kansas.

The consolidated putative class action complaint, filed on July 25, 2016, is captioned In re Westar Energy, Inc. Stockholder Litigation, Case No. 2016-CV-000457. This complaint names as defendants Westar Energy, the members of our board of directors and Great Plains Energy. The complaint asserts that the members of our board of directors breached their fiduciary duties to our shareholders in connection with the original merger. It also asserts that Westar Energy and Great Plains Energy aided and abetted such breaches of fiduciary duties. The complaint alleges, among other things, that (i) the original merger consideration deprived our shareholders of fair consideration for their shares, (ii) the original merger agreement contained deal protection provisions that unfairly favored Great Plains Energy and discouraged third parties from submitting potentially superior proposals, (iii) the disclosures were misleading and/or omitted material information necessary for our shareholders to make an informed decision whether to vote in favor of the original merger and (iv) if the original merger were to have been consummated, certain of our directors and officers may have received significant benefits. The complaint seeks, among other remedies, (i) injunctive relief enjoining the original merger, (ii) rescission of the original merger agreement or rescissory damages, (iii) a directive to members of our board of directors to account for all damages caused by them as a result of their breaches of their fiduciary duties and (iv) an award for costs and disbursements, including attorneys' fees and experts' fees.

The putative derivative complaint, filed on July 5, 2016, and as amended on August 25, 2016, is captioned Braunstein v. Chandler et al., Case No. 2016-CV-000502. This putative derivative action names as defendants the members of our board of directors, Great Plains Energy and a subsidiary of Great Plains Energy, with Westar Energy named as a nominal defendant. The complaint asserts that the members of our board of directors breached their fiduciary duties to our shareholders in connection with the original merger. It also asserts that Great Plains Energy and a subsidiary of Great Plains Energy aided and abetted such breaches of fiduciary duties. The complaint alleges, among other things, that the members of our board of directors failed to obtain the best possible price for our shareholders in the original merger because of a flawed process that discouraged third parties from submitting potentially superior proposals, and that the disclosures are false or misleading due to the omission of certain information. The complaint seeks, among other remedies, (i) a direction that the director defendants exercise their fiduciary duties to obtain a transaction which is in the best interests of us and our shareholders, (ii) a declaration that the original merger was entered into in breach of the fiduciary duties of the defendants and is therefore unlawful and unenforceable, (iii) rescission of the original merger agreement, (iv) the imposition of a constructive trust in favor of the plaintiff, on behalf of us, upon any benefits improperly received by the named defendants as a result of their wrongful conduct, (v) award for costs, including attorneys' fees and experts' fees, and (vi) the imposition of an injunction against the defendants and others from consummating the original merger on the terms proposed.

On September 21, 2016, the parties in the consolidated putative class action and the putative derivative complaint independently agreed to withdraw requests for injunctive relief and otherwise agreed in principle to dismissing the actions with prejudice and to providing releases. In exchange, the parties in the putative derivative complaint agreed that we would make supplemental disclosures to the shareholders, which disclosures were made in a Form 8-K filed on September 21, 2016, and the parties in the consolidated putative class action agreed that we would (i) make the disclosures in the Form 8-K filed on September 21, 2016, and (ii) grant waivers of the prohibition on requesting a waiver of the standstill provisions in the confidentiality and standstill agreements executed by the bidders that participated in the our sale process. These agreements do not constitute any admission by any of the defendants as to the merits of any claims. The September 2016 agreement in principle may be null and void as a result of entering into the amended and restated merger agreement in July 2017. The outcome of litigation is inherently uncertain, and we cannot predict how existing litigation will progress, or whether additional claims may result from the amended and restated merger agreement. The defense or settlement of any lawsuit or claim that remains unresolved at the time the merger closes may adversely affect the combined company's business, financial condition or results of operation.

14. VARIABLE INTEREST ENTITIES

In determining the primary beneficiary of a VIE, we assess the entity's purpose and design, including the nature of the entity's activities and the risks that the entity was designed to create and pass through to its variable interest holders. A reporting enterprise is deemed to be the primary beneficiary of a VIE if it has (a) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and (b) the obligation to absorb losses or right to receive benefits from the VIE that could potentially be significant to the VIE. The primary beneficiary of a VIE is required to consolidate the VIE. The trusts holding our 8% interest in Jeffrey Energy Center (JEC) and our 50% interest in La Cygne unit 2 are VIEs. Upon the expiration of a purchase option in July 2017, we are no longer the primary beneficiary of the trust holding our 8% interest in JEC. We remain the primary beneficiary of the trust holding our 50% interest in La Cygne unit 2.

We assess all entities with which we become involved to determine whether such entities are VIEs and, if so, whether or not we are the primary beneficiary of the entities. We also continuously assess whether we are the primary beneficiary of the VIEs with which we are involved. Prospective changes in facts and circumstances may cause us to reconsider our determination as it relates to the identification of the primary beneficiary.

8% Interest in Jeffrey Energy Center

Under an agreement that expires in January 2019, we lease an 8% interest in JEC from a trust. The trust was financed with an equity contribution from an owner participant and debt issued by the trust. The trust was created specifically to purchase the 8% interest in JEC and lease it to a third party, and does not hold any other assets. We met the requirements to be considered the primary beneficiary of the trust until July 2017, when a contractual option to purchase the 8% interest in the plant covered by the lease expired. Accordingly, we will deconsolidate the trust in the third quarter.

In determining the primary beneficiary of the trust, we had concluded that the activities of the trust that most significantly impacted its economic performance and that we had the power to direct included (1) the operation and maintenance of the 8% interest in JEC, (2) our ability to exercise an option that expired in July 2017 to purchase the plant at the end of the agreement at the lesser of fair value or a fixed amount and (3) our option to require refinancing of the trust's debt. We had the potential to receive benefits from the trust that could potentially be significant if the fair value of the 8% interest in JEC at the end of the agreement was greater than the fixed amount. The possibility of lower interest rates upon refinancing the debt also created the potential for us to receive significant benefits.

50% Interest in La Cygne Unit 2

Under an agreement that expires in September 2029, KGE entered into a sale-leaseback transaction with a trust under which the trust purchased KGE's 50% interest in La Cygne unit 2 and subsequently leased it back to KGE. The trust was financed with an equity contribution from an owner participant and debt issued by the trust. The trust was created specifically to purchase the 50% interest in La Cygne unit 2 and lease it back to KGE, and does not hold any other assets. We meet the requirements to be considered the primary beneficiary of the trust. In determining the primary beneficiary of the trust, we concluded that the activities of the trust that most significantly impact its economic performance and that we have the power to direct include (1) the operation and maintenance of the 50% interest in La Cygne unit 2 and (2) our ability to exercise a purchase option at the end of the agreement at the lesser of fair value or a fixed amount. We have the potential to receive benefits from the trust that could potentially be significant if the fair value of the 50% interest in La Cygne unit 2 at the end of the agreement is greater than the fixed amount.

Financial Statement Impact

We have recorded the following assets and liabilities on our condensed consolidated balance sheets related to the VIEs described above.

		As of		As of
	J	June 30, 2017	Dec	cember 31, 2016
		ls)		
Assets:				
Property, plant and equipment of variable interest entities, net	\$	252,737	\$	257,904
Regulatory assets (a)		11,155		10,396
Liabilities:				
Current maturities of long-term debt of variable interest entities	\$	28,538	\$	26,842
Accrued interest (b)		706		867
Long-term debt of variable interest entities, net		82,653		111,209

⁽a) Included in long-term regulatory assets on our condensed consolidated balance sheets.

⁽b) Included in accrued interest on our condensed consolidated balance sheets.

All of the liabilities noted in the table above relate to the purchase of the property, plant and equipment. The assets of the VIEs can be used only to settle obligations of the VIEs and the VIEs' debt holders have no recourse to our general credit. We have not provided financial or other support to the VIEs and are not required to provide such support. We did not record any gain or loss upon initial consolidation of the VIEs.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Certain matters discussed in Management's Discussion and Analysis are "forward-looking statements." The Private Securities Litigation Reform Act of 1995 has established that these statements qualify for safe harbors from liability. Forward-looking statements may include words like we "believe," "anticipate," "expect," "estimate," "intend" and words of similar meaning. Forward-looking statements describe our future plans, objectives, expectations or goals.

INTRODUCTION

We are the largest electric utility in Kansas. We produce, transmit and sell electricity at retail to customers in Kansas under the regulation of the KCC. We also supply electric energy at wholesale to municipalities and electric cooperatives in Kansas under the regulation of FERC. We have contracts for the sale or purchase of wholesale electricity with other utilities.

In Management's Discussion and Analysis, we discuss our operating results for the three and six months ended June 30, 2017, compared to the same periods of 2016, our general financial condition and significant changes that occurred during 2017. As you read Management's Discussion and Analysis, please refer to our condensed consolidated financial statements and the accompanying notes, which contain our operating results.

SUMMARY OF SIGNIFICANT ITEMS

Proposed Merger with Great Plains Energy

On July 9, 2017, we entered into an amended and restated agreement and plan of merger with Great Plains Energy that provides for a merger of equals between the two companies. Upon closing, each issued and outstanding share of our common stock will be converted into one share of common stock of a new holding company with a final name still to be determined. Upon closing, each issued and outstanding share of Great Plains Energy common stock will be converted into 0.5981 shares of common stock of the new holding company. Following completion of the merger, our shareholders are expected to own approximately 52.5% of the new holding company and Great Plains Energy's shareholders are expected to own approximately 47.5% of the new holding company. We currently expect to close the transaction in the first half of 2018. For more information, see Notes 3 and 13 of the Notes to Condensed Consolidated Financial Statements, "Pending Merger" and "Legal Proceedings," respectively, and Item "1A. Risk Factors."

Earnings Per Share

Following is a summary of our net income and basic EPS.

	Three N	/Ion	ths Ended	l June	e 30,	Six Months Ended June 30,					
	2017 2016 Change					2017	2016	(Change		
		(D	ollars In	Thou	sands, Ex	ccept Per Share Amounts)					
Net income attributable to Westar											
Energy, Inc.	\$ 72,065	\$	72,340	\$	(275)	\$ 131,726	\$ 137,925	\$	(6,199)		
Earnings per common share, basic	0.50		0.51		(0.01)	0.92	0.97		(0.05)		

Net income and basic EPS decreased for the three and six months ended June 30, 2017, compared to the same periods in 2016, due primarily to lower retail sales. The lower retail sales were attributable principally to milder weather. For the six months ended June 30, 2017, we recorded \$6.6 million less in corporate-owned life insurance (COLI) benefits. For the three and six months ended June 30, 2017, we recorded \$9.8 million and \$14.8 million, respectively, more in depreciation due in part to the operation of our Western Plains Wind Farm. Partially offsetting these decreases was a decrease in merger-related expenses for the three and six months ended June 30, 2017 of \$7.5 million and \$7.1 million, respectively.

Current Trends

The following is an update to and is to be read in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in our 2016 Form 10-K.

Environmental Regulation

We are subject to various federal, state and local environmental laws and regulations. Environmental laws and regulations affecting our operations are overlapping, complex, subject to changes, have generally become more stringent over time and are expensive to implement. There are a variety of final and proposed laws and regulations that could have a material adverse effect on our operations and condensed consolidated financial results. See Note 11 of the Notes to Condensed Consolidated Financial Statements, "Commitments and Contingencies," for a discussion of environmental costs, laws, regulations and other contingencies.

CRITICAL ACCOUNTING ESTIMATES

Our discussion and analysis of financial condition and results of operations are based on our condensed consolidated financial statements, which have been prepared in conformity with the instructions to Form 10-Q and Article 10 of Regulation S-X. Note 2 of the Notes to Condensed Consolidated Financial Statements, "Summary of Significant Accounting Policies," contains a summary of our significant accounting policies, many of which require the use of estimates and assumptions by management. The policies highlighted in our 2016 Form 10-K have an impact on our reported results that may be material due to the levels of judgment and subjectivity necessary to account for uncertain matters or their susceptibility to change.

From December 31, 2016, through June 30, 2017, we did not experience any significant changes in our critical accounting estimates. For additional information, see our 2016 Form 10-K.

OPERATING RESULTS

We evaluate operating results based on EPS. We have various classifications of revenues, defined as follows:

Retail: Sales of electricity to residential, commercial and industrial customers. Classification of customers as residential, commercial or industrial requires judgment and our classifications may be different from other companies. Assignment of tariffs is not dependent on classification. Other retail sales of electricity include lighting for public streets and highways, net of revenue subject to refund.

Wholesale: Sales of electricity to electric cooperatives, municipalities and other electric utilities and RTOs, the prices for which are either based on cost or prevailing market prices as prescribed by FERC authority. Revenues from these sales are either included in the RECA or used in the determinations of base rates at the time of our next general rate review.

Transmission: Reflects transmission revenues, including those based on tariffs with the SPP.

Other: Miscellaneous electric revenues including ancillary service revenues and rent from electric property leased to others. This category also includes transactions unrelated to the production of our generating assets and fees we earn for services that we provide for third parties.

Electric utility revenues are impacted by things such as rate regulation, fuel costs, technology, customer behavior, the economy and competitive forces. Changing weather also affects the amount of electricity our customers use as electricity sales are seasonal. As a summer peaking utility, the third quarter typically accounts for our greatest electricity sales. Hot summer temperatures and cold winter temperatures prompt more demand, especially among residential and commercial customers, and to a lesser extent, industrial customers. Mild weather reduces customer demand. Our wholesale revenues are impacted by, among other factors, demand, cost and availability of fuel and purchased power, price volatility, available generation capacity, transmission availability and weather.

Three and Six Months Ended June 30, 2017, Compared to Three and Six Months Ended June 30, 2016

Below we discuss our operating results for the three and six months ended June 30, 2017, compared to the results for the three and six months ended June 30, 2016. Significant changes in results of operations shown in the table immediately below are further explained in the descriptions that follow.

			Three Months Ended June 30,						Six Months Ended June 30,						
		2017		2016		Change	% Chang	ge		2017		2016		Change	% Change
						(Dollars In	Thousands	s, Ex	cept	Per Share A	mou	ints)			
REVENUES:

Gross Margin

Fuel and purchased power costs fluctuate with electricity sales and unit costs. As permitted by regulators, we adjust our retail prices to reflect changes in the costs of fuel and purchased power. Fuel and purchased power costs for wholesale customers are recovered at prevailing market prices or based on a predetermined formula with a price adjustment approved by FERC. As a result, changes in fuel and purchased power costs are offset in revenues with minimal impact on net income. In addition, SPP network transmission costs fluctuate due primarily to investments by us and other members of the SPP for upgrades to the transmission grid within the SPP RTO. As with fuel and purchased power costs, changes in SPP network transmission costs are mostly reflected in the prices we charge customers with minimal impact on net income. For these reasons, we believe gross margin is useful for understanding and analyzing changes in our operating performance from one period to the next. We calculate gross margin as total revenues, including transmission revenues, less the sum of fuel and purchased power costs and amounts billed by the SPP for network transmission costs. Accordingly, gross margin reflects transmission revenues and costs on a net basis. The following table summarizes our gross margin for the three and six months ended June 30, 2017 and 2016.

		Th	ree Months	Enc	led June 30,		-	:	Six Months 1	Ende	ed June 30,

Total	6,647	6,473	174	2.7	13,463	12,725	738	5.8		

Gross margin decreased for the three and six months ended June 30, 2017, compared to the same periods in 2016, due primarily to lower retail sales. The lower retail sales were attributable principally to more mild weather, which particularly impacts residential and commercial customers. During the three and six months ended June 30, 2017, compared to the same period in 2016, there were approximately 14% and 12%, respectively, fewer cooling degree days. During the six months ended June 30, 2017, compared to the same period in 2016, there were approximately 7% fewer heating degree days. Additionally, since 2016 was a leap year, this also contributed to lower retail sales as there was one less calendar day during the six months ended June 30, 2017. Partially offsetting the impact of less favorable weather for both periods was improved sales to industrial customers due partially to a few of our larger, lower margin chemical and oil customers who experienced improved global demand for their products.

Income from operations, which is calculated and presented in accordance with GAAP in our condensed consolidated statements of income, is the most directly comparable measure to our presentation of gross margin, which is a non-GAAP measure. Our presentation of gross margin should not be considered in isolation or as a substitute for income from operations. Additionally, our presentation of gross margin may not be comparable to similarly titled measures reported by other companies. The following table reconciles income from operations with gross margin for the three and six months ended June 30, 2017 and 2016.

Operating Expenses and Other Income and Expense Items

	Three Months Ended June 30,							Six Months Ended June 30,						
	2017		2016	(Change	% Change		2017		2016	C	Change	% Cha	nge
						(Dollars i	n Th	ousands)						
Operating and maintenance expense	\$ 87,1	58 \$	85,619	\$	1,539	1.8	\$	168,356	\$	163,377	\$	4,979		3.0

Operating and maintenance expense increased for the three months ended June 30, 2017, compared to the same period in 2016, due primarily to:

- a \$3.6 million increase in steam generation due primarily to a scheduled outage at JEC; and
- a \$1.3 million increase due to the start of operation of our Western Plains Wind Farm in March 2017; however,
- partially offsetting was a \$4.6 million decrease in nuclear operating and maintenance costs due primarily to receiving a legal settlement for Wolf Creek.

Operating and maintenance expense increased for the six months ended June 30, 2017, compared to the same period in 2016, due primarily to:

- a \$5.6 million increase in distribution maintenance expense;
- a \$3.1 million increase in steam generation due primarily to a scheduled outage at JEC; and
- a \$1.7 million increase due to the start of operation of our Western Plains Wind Farm in March 2017; however,
- partially offsetting increases was a \$6.0 million decrease in nuclear operating and maintenance costs due primarily to receiving a legal settlement for Wolf Creek.

		Three Months	Ended June 30),	Six Months Ended June 30,						
	2017	2016	Change	% Change	2017	2016	Change	% Change			
				(Dollars in	Thousands)						
Depreciation and amortization expense	\$ 94,029	\$ 84,226	\$ 9,803	11.6	\$ 182,655	\$ 167,866	\$ 14,789	8.8			

Depreciation and amortization expense increased during the three and six months ended June 30, 2017, compared to the same periods in 2016, due in part to the start of operation of our Western Plains Wind Farm in March 2017.

			Thre	ee Months	End	led June 30	,				Si	x Months l	Ende	d June 30,		
	:	2017		2016		Change	% Ch	ange		2017		2016		Change	% Change	ā
							(Do	llars in	n Thousands)							
Selling, general and administrative expense	\$	57,579	\$	75,724	\$	(18,145)		(24.0)	\$	116,735	\$	132,179	\$	(15,444)	(11.7	7)

Selling, general and administrative expense decreased during the three and six months ended June 30, 2017, compared to the same periods in 2016, due primarily to:

- a decrease of merger-related expenses of \$7.5 million and \$7.1 million, respectively; and
- a decrease in employee benefit costs of \$4.9 million and \$3.1 million, respectively, attributable partially to our having fewer employees.

		Thr	ee Months	End	led June 30),			Si	x Months	Ende	ed June 30,	
	2017		2016		Change	% Change		2017		2016		Change	% Change
						(Dollars in	Tho	usands)					
Taxes other than income tax	\$ 41,890	\$	48,407	\$	(6,517)	(13.5)	\$	84,606	\$	97,375	\$	(12,769)	(13.1)

Taxes other than income tax decreased for the three and six months ended June 30, 2017, compared to the same periods in 2016, due primarily to a decrease of \$6.7 million and \$13.4 million, respectively, in property tax expense amortization. This represents the amortization of the regulatory asset comprised of actual costs incurred for property taxes in the prior year in excess of amounts collected in our prices in the prior year.

			Thre	e Month	s Enc	ded June 30),			Si	x Months	Ende	ed June 30,

Interest expense increased for the three and six months ended June 30, 2017, compared to the same period in 2016, due primarily to:

- an increase in interest expense on long-term debt of \$2.8 million and \$4.2 million, respectively, due primarily to the issuance of FMBs during June 2016; and
- a decrease in debt AFUDC of \$1.4 million and \$1.6 million, respectively.

		Thr	ee Months	End	led June 30	,			Si	x Months	Ende	ed June 30,	
	 2017		2016	(Change	% Change		2017		2016		Change	% Change
						(Dollars ir	The	usands)					
Income tax expense	\$ 35,906	\$	40,542	\$	(4,636)	(11.4)	\$	56,816	\$	79,165	\$	(22,349)	(28.2)

Income tax expense decreased for the three months ended June 30, 2017, compared to the same period in 2016, due primarily to an increase in tax benefits from production tax credits, largely from placing the Western Plains Wind Farm in service.

Income tax expense decreased for the six months ended June 30, 2017, compared to the same period in 2016, due primarily to lower income before income taxes and an increase in tax benefits from production tax credits.

FINANCIAL CONDITION

A number of factors affected amounts recorded on our balance sheet as of June 30, 2017, compared to December 31, 2016.

		As of		As of			
	J	une 30, 2017	Γ	December 31, 2016		Change	% Change
				(Dollars in Thous	ands)		
Regulatory assets	\$	861,067	\$	879,862	\$	(18,795)	(2.1)
Regulatory liabilities		242,258		239,453		2,805	1.2
Net regulatory assets	\$	618,809	\$	640,409	\$	(21,600)	(3.4)

Total regulatory assets decreased due primarily to the following items:

- a \$17.0 million decrease in deferred employee benefit costs;
- a \$14.1 million decrease in amounts due from customers for future income taxes; and
- a \$7.1 million decrease in amounts deferred for Wolf Creek refueling and maintenance outages; however,
- partially offsetting these decreases was spending \$12.3 million more than collected for the cost to remove retired plant assets; and
- an \$11.0 million increase in AROs.

Total regulatory liabilities increased due primarily to the following items:

- a \$19.9 million increase in the fair value of the NDT; and
- a \$2.5 million increase in amounts recognized in setting our prices in excess of actual pension and post-retirement expense; however,
- partially offsetting these increases was spending \$5.7 million more than collected for the cost to remove retired plant assets; and
- a \$1.2 million decrease for the FERC settlement refund obligation and a \$1.3 million decrease for the KCC approved refund obligation related to the reduced ROE in our TFR.

		As of		As of				
	Ju	ine 30, 2017	D	ecember 31, 2016		Change	% Cha	nge
				(Dollars in Thous	ands)			
Short-term debt	\$	329,200	\$	366,700	\$	(37,500)		(10.2)

Short-term debt decreased due primarily to Westar Energy issuing \$300.0 million in principal amount of FMBs, the proceeds for which were used to repay a portion of commercial paper borrowings, and us retiring \$125.0 million in principal amount of FMBs. See Note 7 of the Notes to Condensed Consolidated Financial Statements, "Debt Financing" for additional information.

	As of	As of			
	June 30, 2017	December 31, 2016		Change	% Change

Total long-term debt	\$ 3,686,180	\$ 3,513,670	\$	172,510	4.9

Westar Energy issued \$300.0 million in principal amount of FMBs and retired \$125.0 million in principal amounts of FMBs. See Note 7 of the Notes to Condensed Consolidated Financial Statements, "Debt Financing" for additional information.

		As of	As of			
	J	une 30, 2017	December 31, 2016		Change	% Change
			(Dollars in Thous	ands)		
Current maturities of long-term debt of variable interest entities	\$	28,538	\$ 26,842	\$	1,696	6.3
Long-term debt of variable interest entities		82,653	111,209		(28,556)	(25.7)
Total long-term debt of variable interest entities	\$	111,191	\$ 138,051	\$	(26,860)	(19.5)

Total long-term debt of VIEs decreased due to the VIEs that hold the JEC and La Cygne leasehold interests having made principal payments totaling \$26.8 million.

	As of		As of				
	 June 30, 2017	De	ecember 31, 2016		Change	% Chang	e
			(Dollars in Thousa	ands)			
Deferred income taxes	\$ 1,794,177	\$	1,752,776	\$	41,401		2.4

Deferred income taxes increased due primarily to the use of bonus and acceleration depreciation methods. This increase was partially offset by the increase of tax assets related to the deferral of current year net operating losses.

		As of	As of			
	Ju	ne 30, 2017	December 31	, 2016	Change	% Change
			(Dollars	s in Thousands))	
Asset retirement obligations	\$	368,233	\$	323,951 \$	44,282	13.7

AROs increased due primarily to revisions for asbestos of \$19.1 million and a new obligation estimated at \$13.5 million related to the completion of Western Plains Wind Farm. See Note 12 of the Notes to Condensed Consolidated Financial Statements, "Asset Retirement Obligations" for additional information.

LIQUIDITY AND CAPITAL RESOURCES

Overview

Available sources of funds to operate our business include internally generated cash, short-term borrowings under Westar Energy's commercial paper program and revolving credit facilities and access to capital markets. We expect to meet our day-to-day cash requirements including, among other items, fuel and purchased power, dividends, interest payments, income taxes and pension contributions, using primarily internally generated cash and short-term borrowings. To meet the cash requirements for our capital investments, we expect to use internally generated cash, short-term borrowings, and proceeds from the issuance of debt and equity securities in the capital markets. When such balances are of sufficient size and it makes economic sense to do so, we also use proceeds from the issuance of long-term debt and equity securities to repay short-term borrowings, which are principally related to investments in capital equipment and the redemption of bonds and for working capital and general corporate purposes. Uncertainties affecting our ability to meet cash requirements include, among others, factors affecting revenues described in "—Operating Results" above, economic conditions, regulatory actions, compliance with environmental regulations and conditions in the capital markets.

Short-Term Borrowings

Westar Energy maintains a commercial paper program pursuant to which it may issue commercial paper up to a maximum aggregate amount outstanding at any one time of \$1.0 billion. This program is supported by Westar Energy's revolving credit facilities. Maturities of commercial paper issuances may not exceed 365 days from the date of issuance and proceeds from such issuances will be used to temporarily fund capital expenditures, to redeem debt on an interim basis, for working capital and/or for other general corporate purposes. As of August 2, 2017, Westar Energy had \$331.5 million of commercial paper issued and outstanding.

Westar Energy has two revolving credit facilities in the amounts of \$730.0 million and \$270.0 million. The \$730.0 million facility will expire in September 2019, \$20.7 million of which will expire in September 2017. The \$270.0 million credit facility will expire in February 2018. As long as there is no default under the facilities, the \$730.0 million and \$270.0 million facilities may be extended an additional year and the aggregate amount of borrowings under the \$730.0 million and \$270.0 million facilities may be increased to \$1.0 billion and \$400.0 million, respectively, subject to lender participation. All borrowings under the facilities are secured by KGE FMBs. Total combined borrowings under the revolving credit facilities and the commercial paper program may not exceed \$1.0 billion at any given time. As of August 2, 2017, no amounts were borrowed and \$19.0 million in letters of credit had been issued under the \$730.0 million facility. No amounts were borrowed and no letters of credit were issued under the \$270.0 million facility as of the same date.

Long-Term Debt Financing

In January 2017, Westar Energy retired \$125.0 million in principal amount of FMBs bearing a stated interest at 5.15% maturing January 2017.

In March 2017, Westar Energy issued \$300.0 million in principal amount of FMBs bearing a stated interest at 3.10% and maturing April 2027.

Debt Covenants

We were in compliance with our debt covenants as of June 30, 2017.

Impact of Credit Ratings on Debt Financing

Moody's and S&P are independent credit-rating agencies that rate our debt securities. These ratings indicate each agency's assessment of our ability to pay interest and principal when due on our securities.

In general, more favorable credit ratings increase borrowing opportunities and reduce the cost of borrowing. Under Westar Energy's revolving credit facilities and commercial paper program, our cost of borrowings is determined in part by credit ratings. However, Westar Energy's ability to borrow under the credit facilities and commercial paper program are not conditioned on maintaining a particular credit rating. We may enter into new credit agreements that contain credit rating conditions, which could affect our liquidity and/or our borrowing costs.

Factors that impact our credit ratings include a combination of objective and subjective criteria. Objective criteria include typical financial ratios, such as funds from operations to total debt and operating cash flow to debt, among others, future capital expenditures and our access to liquidity including committed lines of credit. Subjective criteria include such items as the quality and credibility of management, the political and regulatory environment we operate in and an assessment of our governance and risk management practices.

As of August 2, 2017, our ratings with the agencies are as shown in the table below.

	Westar			
	Energy	KGE		
	First	First	Westar	
	Mortgage	Mortgage	Energy	
	Bond	Bond	Commercial	Rating
	Rating	Rating	Paper	Outlook
Moody's	A2	A2	P-2	Stable
S&P (a)	A	A	A-2	Positive

⁽a) In July 2017, following the public announcement of the amended and restated agreement and plan of merger with Great Plains Energy, S&P revised its outlook for Westar Energy and KGE to positive from negative, pending the outcome of the merger.

Summary of Cash Flows

	Six Months Ended June 30,						
		2017		2016		Change	% Change
	(Dollars In Thousands)						
Cash flows from (used in):							
Operating activities	\$	363,324	\$	328,681	\$	34,643	10.5
Investing activities		(399,118)		(495,963)		96,845	19.5
Financing activities		35,938		169,264		(133,326)	(78.8)
Net change in cash and cash equivalents	\$	144	\$	1,982	\$	(1,838)	(92.7)

Cash Flows from Operating Activities

Cash flows from operating activities increased due principally to our having received \$20.3 million more for wholesale power sales and transmission services, receiving \$14.5 million more from retail customers, and receiving a \$13.0 million refund for income taxes. Partially offsetting these increases was our having received \$6.6 million less in COLI proceeds.

Cash Flows used in Investing Activities

Cash flows used in investing activities decreased due primarily to our having invested \$120.0 million less in additions to property, plant and equipment primarily related to the completion of construction of Western Plains Wind Farm partially offset by our having received \$24.0 million less from our investment in COLI.

Cash Flows from Financing Activities

Cash flows from financing activities decreased due principally to our having issued \$162.0 million less in long-term debt of VIEs, issued \$100.3 million less in long-term debt and redeemed \$75.0 million more in long-term debt. Partially offsetting these decreases was our having redeemed \$163.5 million less in long-term debt of VIEs and repaid \$35.7 million less in commercial paper.

Pension Contribution

During the six months ended June 30, 2017, we contributed \$13.1 million to the Westar Energy pension trust. No payments were made to fund Wolf Creek's pension plan during the same period.

OFF-BALANCE SHEET ARRANGEMENTS

From December 31, 2016, through June 30, 2017, our off-balance sheet arrangements did not change materially. For additional information, see our 2016 Form 10-K.

CONTRACTUAL OBLIGATIONS AND COMMERCIAL COMMITMENTS

From December 31, 2016, through June 30, 2017, our contractual obligations and commercial commitments did not change materially outside the ordinary course of business. For additional information, see our 2016 Form 10-K.

OTHER INFORMATION

Changes in Prices

See Note 4 of the Notes to Condensed Consolidated Financial Statements, "Rate Matters and Regulation," for information on our prices.

New Accounting Pronouncements

See Note 2 of the Notes to Condensed Consolidated Financial Statements, "Summary of Significant Accounting Policies," for information on accounting pronouncements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk, including changes in commodity prices, counterparty credit, interest rates, and debt and equity instrument values. From December 31, 2016, to June 30, 2017, no significant changes occurred in our market risk exposure. See "Item 7A. Quantitative and Qualitative Disclosures About Market Risk" in our 2016 Form 10-K for additional information.

ITEM 4. CONTROLS AND PROCEDURES

We maintain a set of disclosure controls and procedures designed to ensure that information required to be disclosed in reports that we file or submit under the Securities Exchange Act of 1934, as amended (Exchange Act), is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms. In addition, the disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in reports under the Exchange Act is accumulated and communicated to management, including the chief executive officer and the chief financial officer, allowing timely decisions regarding required disclosure. As of the end of the period covered by this report, based on an evaluation carried out under the supervision and with the participation of management, including the chief executive officer and the chief financial officer, of the effectiveness of our disclosure controls and procedures, the chief executive officer and the chief financial officer have concluded that our disclosure controls and procedures were effective.

There were no changes in our internal control over financial reporting during the three months ended June 30, 2017, that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Information on legal proceedings is set forth in Notes 11 and 13 of the Notes to Condensed Consolidated Financial Statements, "Commitments and Contingencies" and "Legal Proceedings," respectively, which are incorporated herein by reference.

ITEM 1A. RISK FACTORS

Our 2016 Form 10-K contains descriptions of risk factors relating to us, as required by Item 503(c) of Regulation S-K. The risk factors under the heading "Risks Relating to the Pending Merger" included in the 2016 Form 10-K, Item 1A. Risk Factors, are replaced with the risk factors described below. Except as indicated below, or as otherwise described in filings we make from time to time with the SEC, including our Quarterly Report on Form 10-Q for the quarter ended March 31, 2017, there were no material changes in our risk factors from December 31, 2016, through June 30, 2017.

We cannot provide any assurance that the merger will be completed. Failure to complete the merger could negatively affect the trading price of our common stock and our future business and financial results.

The closing of the merger is subject to various conditions, including, among others, (i) approval of our shareholders representing a majority of the outstanding shares of our common stock, (ii) approval of Great Plains Energy shareholders representing two-thirds of the outstanding shares of Great Plains Energy common stock, (iii) clearance under the HSR Act; (iv) receipt of all required regulatory approvals from, among others, the FERC, the NRC, the KCC, and the MPSC (provided that such approvals do not result in a material adverse effect on Great Plains Energy or Westar and their respective subsidiaries, after giving effect to the merger, measured on the size and scale of Westar and its subsidiaries, taken as a whole); (v) effectiveness of the registration statement for the shares of the new holding company common stock to be issued to Westar and Great Plains Energy shareholders in the merger and approval of the listing of such shares on the New York Stock Exchange; (vi) the absence of any material adverse effect with respect to Westar, Great Plains Energy and their respective subsidiaries; (vii) the absence of laws or judgments, whether preliminary, temporary or permanent, which may prevent, make illegal or prohibit the completion of the merger; (viii) subject to certain materiality exceptions, the accuracy of the representations and warranties made by Westar and Great Plains Energy, respectively, and compliance by Westar and Great Plains Energy with their respective obligations under the amended and restated merger agreement; (ix) the receipt of tax opinions by us and Great Plains Energy that the merger will be treated as a non-taxable event for U.S. federal income tax purposes; (x) there being no shares of Great Plains Energy preference stock outstanding; and (xi) Great Plains Energy having not less than \$1.25 billion in cash or cash equivalents on its balance sheet.

Although we and Great Plains Energy have agreed in the merger agreement to use our reasonable best efforts to take, or cause to be taken, all actions, and do, or cause to be done, and assist and cooperate with the other parties in doing, all things necessary to cause the conditions to the closing of the merger to be satisfied or to effect the closing of the merger as promptly as reasonably practicable, the conditions to the merger may not be satisfied and the merger agreement could be terminated. In addition, satisfying the conditions to the merger may take longer than, and could cost more than, we and Great Plains Energy expect. The occurrence of any of these events individually or in combination could negatively affect the trading price of our common stock and our future business and financial results and subject us to the following:

- negative reactions from the financial markets, including declines in the price of our common stock due to the fact that the current price may reflect a market assumption that the merger will be completed;
- · performance shortfalls and missed opportunities as a result of the diversion of our management's attention by the merger; and
- potential payments by us to Great Plains Energy for damages, or if the merger agreement is terminated under certain circumstances, a termination fee of \$190.0 million.

The merger is subject to the receipt of consent or approval from governmental entities that could delay the completion of the merger or impose conditions that could have a material adverse effect on the combined company.

Completion of the merger is conditioned upon the expiration or termination of the applicable HSR Act waiting period and the receipt of consents, orders, approvals or clearances, as required, from, among others, the FERC, the NRC, the KCC and the MPSC (provided that such approvals do not result in a material adverse effect on Great Plains Energy or Westar and their respective subsidiaries, after giving effect to the merger, measured on the size and scale of Westar and its subsidiaries, taken as a whole).

On April 19, 2017, the KCC rejected the original proposed acquisition of Westar by Great Plains Energy, and we are unable to predict how the KCC will evaluate the new proposed merger. A substantial delay in obtaining satisfactory approvals or the imposition of unfavorable terms or conditions in connection with such approvals could adversely affect the business, financial condition or results of operations of us or Great Plains Energy or may result in the termination of the merger agreement. Failure to receive satisfactory approvals may also make any alternative future strategic transaction more challenging, which could in turn negatively impact the price of our common stock.

For additional information on the status of various approvals in connection with the pending merger, see Notes 3 and 11 of the Notes to Condensed Consolidated Financial Statements, "Pending Merger" and "Commitments and Contingencies," respectively.

The anticipated benefits of combining the companies may not be realized.

We entered into the amended and restated merger agreement with the expectation that the merger would result in various benefits, including, among other things, synergies, cost savings and operating efficiencies. However, the achievement of the anticipated benefits of the merger, including the synergies, may not materialize or may take longer than expected to materialize. In addition, we may not be able to integrate our operations with Great Plains Energy's existing operations without encountering difficulties, including inconsistencies in standards, systems and controls, and without diverting management's focus and resources from ordinary business activities and opportunities. Any of the foregoing could have a material adverse effect on the combined company.

We will incur significant transaction and transition costs in connection with the merger.

We and Great Plains Energy expect to incur significant transaction and transition costs in connection with the consummation of the merger and the subsequent integration of the companies (in addition to the costs we and Great Plains Energy have already incurred on the prior proposed acquisition of us). Prior to consummation of the merger, we may also incur additional costs to maintain employee morale and to retain key employees. Great Plains Energy will also incur significant fees and expenses in connection with unwinding financing arrangements that were implemented to finance the prior proposed acquisition of us. These expenses could reduce or eliminate the savings that we expect to achieve from the merger, and accordingly, any net benefits may not be achieved in the near term or at all. These transaction and transition expenses may result in significant charges taken against earnings by us prior to the completion of the merger and by the combined company following the completion of the merger.

We will be subject to business uncertainties and contractual restrictions while the merger is pending, which could adversely affect our business.

Uncertainty about the impact of the merger, including on employees and customers, may have an adverse effect on us and Great Plains Energy and, consequently, on the combined company. These uncertainties may impair our and Great Plains Energy's ability to attract, retain and motivate personnel, and could cause customers, suppliers and others that deal with us to seek to change existing business relationships with us and/or Great Plains Energy. If employees depart, our business or the combined company's business could be harmed. In addition, the merger agreement restricts us, without the consent of Great Plains Energy, and Great Plains Energy, without our consent, from taking specified actions until the merger is completed or the amended and restated merger agreement terminates. These restrictions may prevent us or Great Plains Energy from pursuing otherwise attractive business opportunities and making other changes to our respective businesses.

Pending litigation against us and Great Plains Energy could result in an injunction preventing the consummation of the merger or may adversely affect the combined company's business, financial condition or results of operations following the merger.

Following the announcement of the original merger agreement, two putative class action lawsuits were filed in the District Court of Shawnee County, Kansas against Westar Energy, the members of our board of directors and Great Plains Energy, alleging breaches of various fiduciary duties by the members of our board of directors in connection with the proposed merger and alleging that we and Great Plains Energy aided and abetted such alleged breaches of fiduciary duties. A third putative derivative lawsuit was filed in the District Court of Shawnee County, Kansas against the members of our board of directors, Great Plains Energy and a subsidiary of Great Plains Energy, alleging breaches of various fiduciary duties by members of our board of directors in connection with the original proposed transaction and alleging that Great Plains Energy and a subsidiary of Great Plains Energy aided and abetted such alleged breaches of fiduciary duties. Among other remedies, the plaintiffs in each case sought to enjoin the original proposed transaction and rescind the original merger agreement, in addition to certain unspecified damages and reimbursement of costs. On September 21, 2016, the parties in the consolidated putative class action and the putative derivative complaint independently agreed to withdraw requests for injunctive relief and otherwise agreed in principle to dismissing the actions with prejudice and to providing releases. The September 2016 agreement by all parties may be null and void as a result of entering into the amended and restated merger agreement. The outcome of litigation is inherently uncertain, and we cannot predict how existing litigation will progress, or whether additional claims may result from the amended and restated merger agreement. The defense or settlement of any lawsuit or claim that remains unresolved at

the time the merger closes may adversely affect the combined company's business, financial condition or results of operations. See Note 13 of the Notes to Condensed Consolidated Financial Statements, "Legal Proceedings," for additional information.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

XBRL Taxonomy Extension Presentation Linkbase Document

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

Our 2017 annual meeting of shareholders will be held October 25, 2017. Information regarding the time and location of the meeting, and other information relating to the meeting, will be included in a notice of annual meeting and proxy statement that will be sent to shareholders. Shareholder proposals to be included in the proxy statement related to the annual meeting must be received by our Corporate Secretary no later than 5:00 p.m. CT on August 21, 2017. Notice of intent to introduce a proposal at the annual meeting not included in the proxy statement, or to nominate a director for election at the annual meeting, must also be received by our Corporate Secretary no later than 5:00 p.m. CT on August 21, 2017. Proposals and notices must comply with federal law and the requirements in our articles of incorporation and bylaws.

Investors should note that we announce material financial information in SEC filings, press releases and public conference calls. In accordance with SEC guidance, we may also use the Investor Relations section of our website (http://www.WestarEnergy.com, under "Investors") to communicate with investors about our company. It is possible that the financial and other information we post there could be deemed to be material information. The information on our website is not part of this document.

Amended and Restated Merger Agreement, dated as of July 9, 2017, by and among Westar Energy, Inc., Great Plains Energy Incorporated,

Monarch Energy Holding, Inc., King Energy, Inc. and, solely for the purposes set forth therein, GP Star, Inc. (filed as Exhibit 2.1 to the Form

WESTAR ENERGY, INC.

WESTAR ENERGY, INC. CHIEF EXECUTIVE OFFICER CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Mark A. Ruelle, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q for the period ended June 30, 2017, of Westar Energy, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - a. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
